9 - 12. soruları aşağıda verilen metne göre cevaplayınız.

Cyber crime is one of the biggest threats to people nowadays. With organizations becoming more and more technology dependent, experiencing an increase of 22% in cyber crime cases in a year is not surprising. Your home is filled with many valuable items but your computer and email account contain crucial personal information, important work documents, and even your passwords. There are various threats under the title of cyber crimes. Take phishing for the first instance. It involves tricking a computer user into performing some risky action that undermines all their previous security precautions. Secondly, keylogging... you might be sent an innocuous e-mail, even one that looks like it has come from an organization or individual you trust. These e-mails contain links or attachments that, when clicked on, cause malicious code to be downloaded. It could be designed to sit quietly on your computer and steal passwords or banking logins.

9. The main idea of the text is - - - -.

- A) the necessity of being aware of cyber threats
- B) the advantages of using online banking
- C) how to send an e-mail
- D) the details of using valuable items at home
- E) where we download attachments

10. Cyber-crimes are - - - -.

- A) only about clicking false links
- B) contain innocuous tricking
- C) committed only by little children
- D) not so much important
- E) about various threats on virtual world

11. Cyber-crime is - - - -.

- A) more and more technology development
- B) merely seen on false e-mail accounts
- C) an important invention
- D) one of the biggest threats to people nowadays
- E) deserves more support today

12. The author implies in the text that - - - -.

- A) e-mails might be trusted if you receive them from an organization
- B) even innocuous- looking e-mails might be risky
- C) we can always click on familiar links
- D) using online communication is crucial
- E) people are safer on the virtual world
